

GRAND THEFT AUTO V: BLOODLINES

Solo Character Story Missions (SM01–SM09) • Personal Debts, Origin Flashpoints & Mastery Quests

1. SOLO MISSIONS RATIONALE & STRUCTURAL INTEGRATION

PACING, INDIVIDUAL AGENCY & MECHANISTIC FOCUS

While the main 70-mission campaign focuses on high-octane trio coordination, these 9 dedicated Solo Missions (3 per protagonist across Acts I, II, and III) provide narrative intimacy and deep individual gameplay loops:

- **Ice (Darius Vance):** Focuses on black-market military arms logistics, gritty CQC takedowns, and settling painful wartime betrayal debts from his military deployment years.
- **Gohan (Devin Mercer):** Focuses on pure stealth infiltration, electronic warfare, physical server splicing, and exacting revenge on the white-collar auditors who originally framed him.
- **Guess (Ron Ortiz):** Focuses on illegal underground street racing, midnight drift contracts, hazardous off-road speed runs, and securing maritime escape pipelines for the crew's family.

2. ACT I SOLO MISSIONS: INDEPENDENT TRADECRAFT (SM01–SM03)

Taking place between Missions 03 and 08 in Los Santos, each brother operates alone to establish his independent supply pipeline before the Port Heist.
