

LOS SANTOS: BLOODLINES

A 70-Mission Tri-Protagonist Overhaul • Character Revision Edition

1. EXECUTIVE CONCEPT & NARRATIVE FOUNDATION

Los Santos: Bloodlines is an action-thriller narrative campaign built within the Grand Theft Auto V engine. The storyline centers on three Black childhood friends from South Central Davis who left on athletic and academic scholarships fifteen years prior. Having re-entered the criminal underworld through distinct, high-stakes trades, they inadvertently crash into one another during an offshore wetwork operation at Terminal Island.

The design discards standard slow escort missions in favor of rapid, multi-vehicle combat operations featuring synchronized character switching, high-altitude drops, sea-to-land breaches, and full-city pursuits.

2. PROTAGONIST PROFILES & NPC MODEL BINDINGS

Darius "Ice" Vance THE TACTICIAN • HEAVY ASSAULT Appearance: Tall, imposing athletic build, long locs/dreads. GTA V Ped Hash: <code>G_M_Y_FamCA_01</code> (or custom rigged) <code>IG_Claypain</code> / Franklin dreads variation) Special Ability: <i>Overwatch Focus</i> — Slows combat stagger, enhances weapon penetration, and minimizes weapon recoil. Vehicle Focus: Heavy armor, tactical gunships (Savage, Buzzard, Insurgent).	Devin "Gohan" Mercer THE INSIDE MAN • BREAKER Appearance: Medium height, stocky build, clean standard natural hair / low taper fade. GTA V Ped Hash: <code>G_M_Y_FamDNF_01</code> (or <code>MP_M_Freemode_01</code> custom face morph) Special Ability: <i>Thermal Pulse</i> — Wall-penetrating vision tracking guard telemetry, cameras, and electrical conduits. Vehicle Focus: High-spec tuners, stealth minisubs (Kraken), interceptors.	Ron "Guess" Ortiz THE WHEELMAN • HOTFOOT Appearance: Shorter, wiry build, clean bald head. GTA V Ped Hash: <code>G_M_Y_BallaEast_01</code> (bald variant) or <code>CS_Stretch</code> head mesh Special Ability: <i>Slipstream Reflex</i> — Extreme driving time-dilation enabling instant weight recovery and impossibly sharp drift arcs. Vehicle Focus: Tuner platforms, stunt planes (Mallard/Titan), speedboats.

3. THE INCITING COLLISION: "GHOST IN THE DOCKYARD"

MISSION 01: TERMINAL ISLAND DRY-DOCKS (02:00 HOURS) Three unrelated contracts cross wires: Ice is perched on a container crane to assassinate a cartel capo aboard a dry-docked superyacht; Gohan infiltrates the vessel's lower decks to rip an encrypted cold-storage ledger; Guess breaches the adjacent warehouse bay to boost a rare high-performance prototype car. The Fatal Recognition: A dropped radio callsign exposes their identities. The three stop to verify each other's faces, creating a 90-second gap that allows the cartel target to flee on an armored launch while servers remain partially intact. The <i>Cifuentes Cartel</i>, private defense contractor <i>Aegis Tactical</i>, and the <i>LSPD Special Investigations Division</i> immediately tie the trio to the joint strike.

■ 4. 70-MISSION CAMPAIGN ARCHITECTURE

PART I: THE BLEEDING TRAIL

Missions 01 – 22

Setting up base in an abandoned Cypress Flats industrial shop, the trio works to clean biometrics, settle gang bounties, and eliminate corrupt forensic detectives before their identities go live on federal wiretaps.

M06: "Clean Sweep" (First Dynamic Tri-Switch)

Heist on the Vespucci LSPD Evidence Depot. Gohan drops building power via access tunnels; Ice holds off tactical SWAT units in the alleyway using heavy ordnance; Guess handles the armored getaway van timed to a passing freight train.

M10: "Open Throttle" (Combat Escort Gauntlet)

Escorting a modified engine transport across Del Perro Freeway at 95+ mph under relentless attack from cartel choppers and dirt bikes. Ice repels gunships with an RPG, Gohan disables hostile ECUs via portable EMP, and Guess pits aggressive interceptors.

M19–M22: "The Port of Los Santos Heist"

Multi-phase major score involving Fort Zancudo Cargobobs, underwater container cutting, and high-speed maritime escape under Coast Guard fire.

PART II: THE SQUEEZE

Missions 23 – 48

Driven out of Los Santos and into hiding across Blaine County. The crew discovers that Aegis Tactical and the Cifuentes Cartel are running an illicit arms pipeline through the Alamo Sea basin.

M27: "Flight Risk" (Mid-Air Boarding Gauntlet)

Guess maneuvers a stunt plane directly over a chartered Shamal jet at 8,000 feet. Ice skydives onto the roof, cuts the cabin hatch with a torch, and eliminates the cartel crew in freefall before dropping into the Pacific to Gohan's speedboat.

M34: "Mud & Iron" (Badlands Half-Track Escort)

Traversing the Senora Desert in an armored half-track while dodging anti-materiel snipers mounted on wind turbines and low-flying planes dropping incendiary ordnance.

M44–M48: "The Paleto Deep-Sea Incursion"

Coordinated assault on an Aegis offshore oil platform using Kraken submersibles, mini-gun Mavericks, and hull-breaching thermite charges to seize cartel bearer bonds.

PART III: SCORCHED EARTH

Missions 49 – 70

Total urban warfare as PMC units, cartel hit squads, and militarized police close the county borders. The crew executes an all-out offensive to wipe out the leadership of all three organizations simultaneously.

M55: "Skyline Descent" (Triple Penthouse Raid)

Simultaneous coordinated breaches into three high-rises across Downtown within an exact five-minute timer to zero out cartel escrow accounts.

M62: "Steel Horizon" (Train / Sea / Air Convergence)

Intercepting a high-speed coastal freight train. Ice clears automated flatbed rail turrets, Gohan matches speed in an ocean launch while jamming signals, and Guess extracts the crew via an Annihilator chopper.

M68–M70: "Blood Brothers" (The Climax)

A three-stage final offensive through the Los Santos River canal, the Maze Bank Tower, and an 18-wheeler running gun battle down Runway 30L at LSA, ending with a three-man holdout inside a grounded cargo plane.

■ 5. TECHNICAL IMPLEMENTATION FRAMEWORK

SYSTEM LAYER	MODDING TOOLCHAIN	IMPLEMENTATION SPECIFICATION
MISSION ENGINE	Script Hook V .NET (C#)	

SYSTEM LAYER	MODDING TOOLCHAIN	IMPLEMENTATION SPECIFICATION
		Controls dynamic 3-character switching, native cutscenes, mission checkpoints, and custom fail conditions.
INTERIORS & NODES	CodeWalker MLO Tools	Opens inaccessible interiors (dock warehouses, penthouse suites, hangar bays) and lays AI combat cover nodes.
ENTITIES & MODELS	OpenIV (.RPF Archives)	Injects exact NPC ped models (FamCA_01, FamDNF_01, BallaEast_01) and sets up custom weapon loads.
SCRIPT PROTOTYPING	Mission Maker v1.7+	Used for fast route plotting, AI relationship groups (Hate/Like), and mission objective testing.

■ 6. PRODUCTION SCRIPT: DYNAMIC 3-WAY CHARACTER SWITCH CONTROLLER

C# script hook controlling character model spawning, camera transitions, and combat behavior for Ice, Gohan, and Guess:

```
using System;
using System.Windows.Forms;
using GTA;
using GTA.Math;
using GTA.Native;

public class BloodlinesSwitchController : Script
{
    private Ped ice, gohan, guess;
    private int activeHero = 0; // 0 = Ice (Darius), 1 = Gohan (Devin), 2 = Guess (Ron)

    public BloodlinesSwitchController()
    {
        Tick += OnTick;
        KeyUp += OnKeyUp;
    }

    private void OnKeyUp(object sender, KeyEventArgs e)
    {
        if (e.KeyCode == Keys.D1) ExecuteSwitch(0);
        if (e.KeyCode == Keys.D2) ExecuteSwitch(1);
        if (e.KeyCode == Keys.D3) ExecuteSwitch(2);
    }

    private void ExecuteSwitch(int targetIndex)
    {
        if (targetIndex == activeHero) return;

        Ped target = (targetIndex == 0) ? ice : (targetIndex == 1) ? gohan : guess;
        Ped current = Game.Player.Character;

        if (target != null && target.IsAlive)
        {
            // Trigger GTA V aerial camera transition
            Function.Call(Hash.START_PLAYER_SWITCH, current, target, 0, 1);
            Game.Player.ChangeModel(target.Model);

            // Assign combat posture to companion AI when relinquished
            current.Task.FightAgainstHatedTargets(200.0f);
            activeHero = targetIndex;
        }
    }

    private void OnTick(object sender, EventArgs e)
    {
        // Keep unswitched companions from dropping to random ambient damage
        if (ice != null && activeHero != 0) ice.Health = 200;
        if (gohan != null && activeHero != 1) gohan.Health = 200;
    }
}
```
